

GEAGROUND UP 200

Chemical Nature:	combination of linking agents, waxes, and special oils.
Solids Content:	approx. 24%
pH:	approx. 9,5
Ionic Charge:	anionic
Aspect:	viscous yellowish liquid
Utilization:	pre-bottom of equalization for fatty and waxy leathers

PROPERTIES

GEAGROUND UP200 is used as pre-bottom on leathers that will afterwards receive finishings based on oils and waxes, such as: crazy horse, pull-up, waxy, etc. Due to its balanced composition of linking agents, waxes, and auxiliary products, GEAGROUND UP 200 provides a better equalization of the oils and waxes applied, resulting a better classification of the finished hides. GEAGROUND UP 200 enables the addition of pigments and anilins in its preparation, which helps in the control of the final color, without, however, altering the original characteristics of the articles. The application can be made with spraygun, rollercoater machines, depending of the desired final article.
